SUMMARY

Second-year B.Tech Information Technology student with hands-on experience building AI-integrated Android applications using Kotlin, Jetpack Compose, and Firebase. Practical experience integrating the Gemini API and RESTful services, with a growing foundation in data structures, Python, and C. Combines software development with UI/UX and visual-communication skills to design, build, and ship usable products independently.

EDUCATION

B.Tech, Information Technology — Sathyabama Institute of Science and Technology, Chennai, Tamil Nadu

Expected Graduation: April 2029 | CGPA: 7.3 / 10

Relevant Coursework: Data Structures & Algorithms, Programming in Python & C, Discrete Mathematics, Calculus & Statistics

TECHNICAL SKILLS

- Programming & CS Fundamentals: Python, C, Data Structures & Algorithms, OOP fundamentals, Git/GitHub
- Mobile Development: Kotlin, Jetpack Compose, Android SDK, MVVM Architecture, Android application development
- Backend / Cloud: Firebase (Authentication, Firestore), RESTful API integration
- AI / Generative AI: Gemini API, Google AI Studio, AI-assisted development, AI feature integration
- Web Development: HTML, GitHub Pages, web deployment fundamentals
- Design & Product: Figma, UI/UX prototyping, Google Stitch, Canva
- Currently Exploring: SwiftUI/iOS development, cloud/backend technologies

PROJECTS

CivicMail AI — Hackathon Project | *Kotlin, Jetpack Compose, Firebase, Gemini API*

- Engineered the core AI integration in a 4-member hackathon team, calling the Gemini API to convert natural-language civic complaints into structured reports with suggested subject lines and relevant-authority recommendations.
- Built application logic and UI in Kotlin and Jetpack Compose following MVVM architecture, shipping a deployment-ready Android build with Firebase Authentication and a Firestore data model for real-time complaint tracking.
- Collaborated across AI integration, UI, backend, and visual design to take the project from hackathon concept to a working, demoable product.

RemindCare — In Development | *Kotlin, Jetpack Compose, Google AI Studio*

- Designing a care-coordination app connecting caregiver and user roles, with large, high-visibility reminders and full-alert notifications for medication and daily tasks.
- Building reminder logic supporting photo-confirmation of completed tasks and contextual details (dosage, image, location), prototyping with Google AI Studio and AI-assisted development tools.

Personal Developer Portfolio | *HTML, Git, GitHub Pages*

- Built and deployed a personal portfolio site (h4rysh.github.io/portfolio) showcasing projects, technical skills, and ongoing experimentation.

EXPERIENCE & LEADERSHIP

IE(I) Student Chapter — Treasurer & Media/Design Team Lead | *Institution of Engineers, India*

- Serve as Treasurer for the chapter, managing finances and budgeting for chapter events and initiatives.
- Oversee the chapter's Media and Design team, directing visual content and creative output across chapter activities.

Adriot Club — Media Team | *Visual Communication*

- Created posters and edited videos for club content; contributed ideas on shot planning during team calls, gaining practical experience in visual communication alongside technical work.

ProtoTech — Student Technical Event Initiative | *Planning & Coordination*

- Led end-to-end planning for a proposed student-led technical event, developing the concept and coordinating logistics through structured team discussions.
